\* The coverage limit for prosthesis, implants and consumables are subjected to the case management review and approval.

\*\* Emergency dental : is An acute disorder of Oral health that requires dental/or medical attention ,restricted to broken, loose and/or avulsed teeth caused by traumas; as well as trauma that lead to injuries to soft and hard craniofacial tissues; acute infections lead to facial swelling , limitation of mouth opening and air way obstruction. According to the definition above the list of dental services include the following categories (non-specific to any speciality):

1. Emergency treatment for Acute Facial Swelling
2. Surgical Emergency treatment due to immediate trauma to oral and craniofacial tissue.
3. Treatment due to immediate trauma (teeth)

**Important points:**

- Case management: is a method of managing the provision of health care to members with high cost medical conditions. The goal is to coordinate the care so as to both improve continuity and quality of care as well as cost effectiveness. Case Management is a collaborative process which assess, plans, implements, coordinates, monitors and evaluates the options and services required to meet an individual's health needs , using communication and available resources to promote quality , cost-effective outcomes.
- ENAYA reserves the right to subject the approval for any treatment for which the medical justification is not clearly evident to the case management finding and the second opinion report.
- According to ENAYA scheme some treatments can be capped to certain limit and any additional costs beyond the cap will be borne by the member.
