| | Storage areas for general medical, emergency | | |
|---------|---|--|--|
| 6.9. | supplies, medications and equipment shall be under | | |
| 0.9. | staff control and out of the path of normal traffic. | | |
| 8 | STANDARD FOUR: DIAGNOSTIC IMAGE QUALITY | | |
| | The department shall develop a mechanism of | | |
| | accepting, declining, or referral of radiology requests | | |
| 8.2. | based on clinical indication as per DHA referral | | |
| | guidelines. | | |
| 10 | STANDARD SIX: TELERADIOLOGY | | |
| | Equipment guidelines cover two basic categories of | | |
| 10.6. | teleradiology: | | |
| | Small matrix size (e.g., CT, MRI, ultrasound, nuclear | | |
| | medicine, digital fluorography, and digital | | |
| | angiography). The data set should provide a minimum | | |
| 10.6.1. | of 512 x 512 matrix size at a minimum 8-bit pixel | | |
| 10.6.1. | depth for processing or manipulation with no loss of | | |
| | matrix size or bit depth at display. | | |
| | Large matrix size (e.g., digital radiography and | | |
| | digitized radiographic films). These images should be | | |
| | digitized to a matrix size corresponding to 2.5 lp/mm | | |
| 10.6.2. | or greater measured in the original detector plane. | | |
| 10.0.2. | These images should be digitized to a minimum 10- | | |
| | pixel byte depth. | | |
| 10.8. | The system shall include the following: | | |
| | | | |
| | Annotation capabilities including patient name, | | |
| | Annotation capabilities including patient name, identification number, date and time of examination, | | |
| | | | |
| 10.8.1. | identification number, date and time of examination, | | |
| 10.8.1. | identification number, date and time of examination, name of facility or institution of acquisition, type of | | |
| | identification number, date and time of examination, name of facility or institution of acquisition, type of examination, patient or anatomic part orientation | | |
| 10.8.1. | identification number, date and time of examination, name of facility or institution of acquisition, type of examination, patient or anatomic part orientation (e.g., right, left, superior, inferior), | | |
