INTRODUCTION

The Social and Economical Development Plan essentially relies on the available statistical data relevant to social and economic services as well as data related to health services, in order to draw and realize its targets. The study and analysis of data regarding health services provides a better understanding of the current situation in health as well as informing the preparation of the Health Services Plan deemed an integral element of any social and economical development.

If the success of a health plan is to be measured through meeting the future needs of health services; then defining such needs and identifying their priority through analysis of the indicators of the nature and volume of those services is essential.

DOHMS has recognized the significance of health planning as being an ongoing process of defining the targets and means of health services development. Therefore every possible effort has been made to establish and implement the health plans and set alternatives for the future.

The annual statistical book of the year 2005 demonstrates a modern image of DOHMS health services which reflects the developmental phases throughout the previous years. Quantity aspects are represented by the health facilities and the categories of employed staff. Quality is represented by the services provided in these health facilities. Accordingly it is worth mentioning that this type of information is participating significantly in accumulating and updating the health data system not only DOHMS wide but also throughout the UAE.

This book is greatly appreciated and significant for all students and researchers in the health development field and will provide a reference for researchers and those concerned in establishing health plans.

PRESIDENT, DEPARTMENT OF HEALTH & MEDICAL SERVICES**

PREFACE

Health services statistical data is believed to be a critical element in any successful health care plan, for its vital role in preparing and implementing those plans. Such data is considered the main source to recognize the current health situation and propose the proper alternatives for the plan at its establishment phases. The data is also an indicator for future changes that may influence any amendments in the plan targets and change the priorities as the implementation phase take place.

The Department of Health & Medical Services has achieved a huge increase in the quality and quantity of the provided services through its various facilities in the Emirate of Dubai and the surrounding remote areas. By that means DOHMS becomes not only an essential center for health development in the country; but is also considered one of the outstanding institutions in this field amongst similar institutions in advanced countries.

The statistical data mentioned in this book provides an illustration for the provided services at the Department of Health & Medical Services and demonstrates its development phases throughout the past years in terms of its facilities and volume of services provided by such outlets. Such data significantly participates in accumulating and updating the health data system not only DOHMS wide but also throughout the UAE. Such a book is considered as a rich source for students, researchers and those concerned in establishing health plans.

**QADHI SAEED AL MUROOSHID
DIRECTOR GENERAL
DEPARTMENT OF HEALTH & MEDICAL SERVICES**

Introduction

The issued annual statistical book of the year 2005 for The Department of Health & Medical Services contains detailed and accumulative available data from its hospitals and health centers database in addition to the data prepared manually in the hospitals and PHC for some of the other specialties that are not contained in the database.

This report covers the following statistical data;

- 1- Detailed data on the provided health services at DOHMS hospitals and health centers.
- 2- Presenting the data chronologically through proper illustrative diagrams to make access to such materials easy for those concerned in health development and planning, and for the purpose of statistical research.
- 3- A comparison between hospitals which provide health services and staff.
- 4- Outline in detail the working power at DOHMS and conduct a comparative study for the various expenditure methods whether it is estimated or the actual.
- 5- Remarks and clarifications on the data mentioned in the report.
- 6- The significant health indicators of the vital sign in the health planning process and support for the decision maker to identify the priorities and prepare the plans along with a proper follow up and evaluation for the activities. These activities include the provision of health services, usage, productivity, health system efficiency and evaluation of the quality of the health services provided.

The above data is presented in both Arabic and English languages for the best interest of all health services concerned bodies and organizations.

It is anticipate that we have successfully presented a clear reflection of DOHMS efforts in the development process of health services in the Emirate of Dubai.

EXPLANATION & COMMENTS

الوصف والتعليق

INTRODUCTION:

مقدمة:

Analysis of data is an essential element of health information system. To maximize the use of HIS implemented in DOHMS, there should be an adequate statistics analysis of data capable of providing information required by all levels of health planners and managers for planning, programming, budgeting, monitoring, control, evaluation and coordination of health programs and by other members of health care personnel. The system provides also specific health information to users outside the health sector particularly policy makers, socioeconomic planners and the general public.

Here our aim of the Annual Statistical Book 2005 has been to analyse the statistical data and obtain the health indicators for governmental and private sectors. We hope that it will provide decision makers, health planners and researcher with necessary information for finding potential problems, preparing plans, monitoring and evaluating health status, service performance and resources availability.

يعتبر تحليل البيانات الإحصائية هو العنصر الأساسي لتحويل البيانات إلى معلوماتٍ وللاستفادة القصوى من بيانات نظم المعلومات الصحية المطبقة بالدائرة، كان لزاماً وجود نظام تحليل إحصائي قادر على تقديم المعلومات التي يحتاج إليها جميع مستويات المخططين الصحيين والإداريين لتطوير وتخطيط وبرمجة ووضع ميزانية وتقييم البرامج الصحية وتقديم الخدمات الصحية بشكل أفضل.

كما يمكن الاستفادة من هذه المعلومات من قبل مقدمي الخدمة الصحيين ورسمي السياسات والمخططين الاقتصاديين والاجتماعيين والمواطنين خارج القطاع الصحي.

ويهدف الكتاب الإحصائي السنوي 2005 إلى تحليل البيانات الإحصائية واستخراج مؤشرات الخدمات الصحية في كل من القطاع الصحي الحكومي والقطاع الصحي الخاص على مستوى إمارة دبي.

أملين أن يجد صانعي القرار والمخططين الصحيين والباحثين، في هذا الكتاب المعلومات اللازمة لتحديد الأولويات ووضع الخطط ومراقبة وتقييم الوضع الصحي وأداء الخدمة وتوفر الموارد.
